FOREWORD

This Sale presents a rare opportunity to source robot trained cows from the well established Aghavilly Herd which was established in the 1980's and has continued to stay at the top of Holstein Breeding with fantastic lifetime yields and components .

This fantastic Herd is currently producing a herd average of 10,805kg at 4.28 Butterfat and 3.53 Protein.

These fantastic results are being achieved with no use of a diet feeder, but with meal being fed only in robot and out of parlour feeders. Which is a substantial labour and cost saving measure and a testament to the elite production traits of the Aghavilly Herd.

This sale comprises of some very special highly classified young cows with yields up to 80 litres per day. The springing heifers and youngstock also present some exciting opportunities in this sought after catalogue of superior Holstein females.

This sale promises a day out to remember.
