## **FOREWORD**

David & Linda Cowgill have milked cows at Horsehey Farm, Bashall Eaves, for over 40 years with registered cattle being at the heart of their farming enterprise the entire time. A herd dispersal sale was held on the farm in the early 2000's and soon after the Heygill Holstein herd was rebuilt with select cow families purchased from leading herds around the country. These families have thrived and grown over the generations and provided countless good descendants that shape the present herd.

More recently David & Linda have been joined on the farm by their son Robert, who has continued the family's enthusiasm for dairying, breeding and Holstein pedigrees. It is however, unfortunately due to David's ill health that the difficult decision has been made to disperse the herd.

The sale brings on to the market some 115 cows in milk together with all subsequent youngstock. The herd is run on a very simple system with the milking cows currently fed big bale silage and cake in the parlour to yield. Whilst the cows currently produce a very very commendable average of almost 10,000kg, it would need to be strongly emphasised that these cows have huge scope for further yields on a more intensive system. Currently the herd averages 30kg/ head @ 4.0fat 3.4 pro, SCC100.

Breeding good productive cows with high conformation has always been the Cowgill's aim and the herd contains many great cows. The younger end of the herd particularly, contain many super individuals for the future and should provide confidence in the quality of the youngstock following on, that also sell. The herd contains a very commendable 50 milkers classified VG/EX with many more that will follow suit in time.

The herd has a very good health status being fully vaccinated, 4yr TB and with no positive johnes cows. Please see the accompanying vet letter for further details.

Finally, it remains, on behalf of ourselves and Gisburn Auction, to thank the Cowgill family for their instruction to disperse their herd and we both look forward to welcoming you to Gisburn Auction on 6<sup>th</sup> March. Please note that the sale will follow the regular weekly fresh heifer sale.

## Cowgill, Horse Hey Farm

We have been privileged to work alongside the Cowgill family and their pedigree Heygill Holstein herd for over fifteen years.

This high yielding herd have a 305-day yield of 9373kg, average fat 3.93%, average protein 3.38%, and average SCC 125,000. The herd have an average calving interval of 387 days and an average age of first calving of 25 months old. These figures reiterate the hard work the Cowgill family put into their herd. The farm has had success at many local shows; the main highlight being qualifying a calf for the National Holstein Show.

The herd benefit from a proactive approach to herd health including routine fertility visits, selective dry cow therapy, Calf Club visits, BVD tag and testing (never had a virus positive calf in the seven years they have tested), and quarterly individual milk Johnes testing. The farm are a keen member of the Oakhill Calf Club which includes monitoring all heifers for colostrum transfer and weight gain and vaccinating them against pneumonia. Within this club of over 30 farms they have the best average growth rate over the last five years.

Herd's infectious disease status and vaccination programme:

- Tuberculosis (TB): The herd has never had any cases of TB, are in a 4 yearly testing parish and the herd passed their routine herd test in April 2024.
- Infectious Bovine Rhinotracheitis (IBR): Vaccinated with Bovillis IBR marker live; monitored by quarterly bulk milk testing. Last herd vaccination was administered December 2024.
- Bovine Viral Diarrhoea (BVD): Fully vaccinated with Bovillis BVD. Last herd vaccination was administered December 2024. All calves (beef and heifers) have been tag and tested for the last seven years and they have never had a BVD virus positive calf
- Leptospirosis: Fully vaccinated with Spirovac. Last herd vaccination was administered December 2024.
- Johnes disease: Quarterly individual milk testing, (no positive animals in the herd), and Action Johnes plan implemented.
- Lungworm: First season grazers vaccinated with Huskvac.
- Calf scour: Dry cows vaccinated with Fencovis to protect against Rotavirus, Coronavirus and *E.coli*.
- Calf pneumonia: Calves over a week old vaccinated with Bovalto respi intranasal to protect against Respiratory Syncytial Virus (RSV) and Parainfluenza 3 virus (PI3).

If there are any further questions about the health of the herd, I am happy to speak with anyone interested.

Congratulations to the Cowgill family on their fantastic herd and good luck for the sale and all future plans.

## CONDITIONS OF SALE

1. The biddings to be regulated by the Auctioneers, in terms of 'guinea' bids and multiples thereof, each guinea to be equivalent to 105 new pence (£1.05); if any dispute should arise, the lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give a reason for such action.
2. The Purchaser to give his name and dwelling place and pay for all lots at the close of sale. No lot or lots shall be removed from the sale premises until paid for, and pass-out slip obtained from the Auctioneer' clerk.
3. Notwithstanding the foregoing and the following Condition 4 each and every lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective Purchaser or Purchasers thereof and shall be removed from the sale at the Purchaser's expense within a week of the sale.
- 4.1. If any lot or animal (s) is not paid for in cash under Condition 2 above but payments is made by cheque or other form of negotiable instrument then the animal(s) shall remain the sole and absolute property of the Vendor as legal and equitable owner until such time as all money due to the Vendor has been paid by the Purchaser, Payment shall unless otherwise agreed be made to the Auctioneers and shall not be deemed to have been paid until any cheque or other negotiable instrument has been cleared by the Auctioneers Bankers and the following further provisions contained in Condition 4 shall apply.
- 4.2. The Purchaser acknowledges that he is in possession of the animal(s) as bailee for the Vendor until such time as the animal(s) has been paid for or pursuant to the provisions of Condition 4.1.
- 4.3. The Purchaser undertakes to house any animal on his premises separately from his own and those of any other person and in such a manner which makes them readily identifiable as the Vendor's.
- 4.4. The Purchaser's right to possession of such animal(s) shall cease if he does anything or fails to do anything which could entitle a receiver to take possession of the animal(s) or which would entitle any person to present a petition for the winding up of the Purchaser.
- 4.5. The Vendor or the Auctioneers may for the purpose of the examination or recovery of animals enter upon any premises where they are housed or where they are reasonably thought to be housed.
- 4.6. If the Purchaser shall sell on the animal(s) the entire proceeds shall be held in trust for the Vendor and shall not be mingled with any other money paid into any overdrawn bank account and shall at all times be identifiable as the Vendor's money.
- 4.7. The Purchaser warrants that he is not at the time of entering into any agreement to purchase the animal(s) insolvent and knows of no circumstances which would entitle any creditor to appoint a receiver or to petition for winding up or to exercise any rights over and against the purchaser's assets.
- 4.8. Without prejudice to any other to any right or remedy of the Vendor or the Auctioneers of the Purchaser shall be in breach of any of the conditions set out in this Condition 4 or any of the other conditions herein contained the Vendor or the Auctioneers shall have power to resell the lots retaining any surplus and charging any deficiency or expense to the defaulter or Purchaser.
5. All statements in the catalogue or made by the Auctioneers at the time of the sale, also the identification of the animals, are the entire responsibility of the Vendor. The Auctioneers take no personal responsibility for the correctness of any such statement or identities.
6. All statements made either in the catalogue or any made by the Auctioneers at the time of the sale relating to Tuberculin or any tests to be taken as statements of fact only. No such statement shall guarantee the Purchasers of any animals against loss arising through subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
7. Neither the Vendor nor the Auctioneers will be responsible for any accident through fire or any other cause whatsoever, nor for any damage done by animals prior to, during or after the sale.
